公司简介 | Company Profile

公司创建于1988年,现厂区占地面积为8400多平方米.目前公司的主导产品为散热器恒温阀、温度控制器。主要出口到：美国、加拿大、德国、法国、英国、意大利、俄罗斯、比利时、匈牙利等二十多个国家和地区,并为多国著名企业进行ODM\OEM。

公司已通过ISO9001质量管理体系认证;产品分别通过UL、CE、CQC认证，散热器恒温阀已通过欧洲EN215认证。恒温阀及电热执行器也获得外观设计专利和实用新型专利。

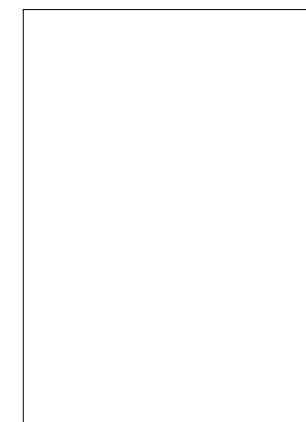

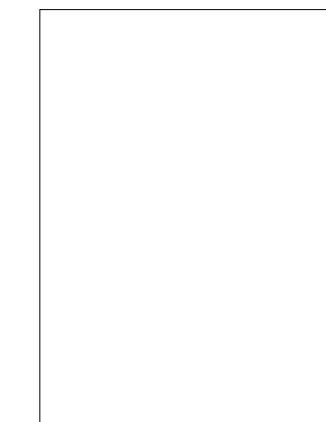

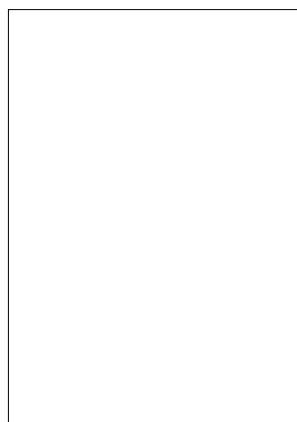

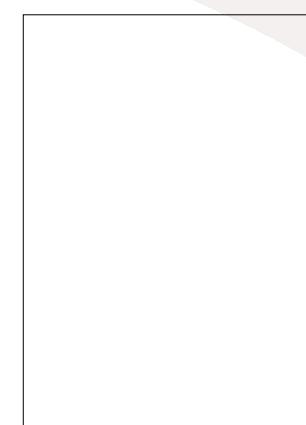

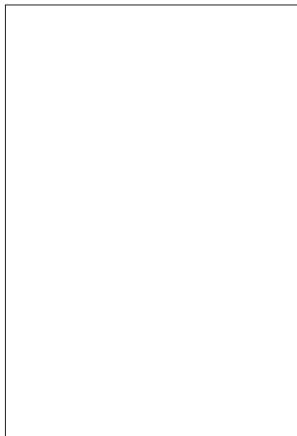

“达世界水准，创国际品牌”是我公司的长期目标;“铸就品质，诚信共赢”是我公司的宗旨，我公司将进一步致力于开发暖通、空调的新产品，为您提供优质可靠的产品,让您的生活和工作舒适而轻松。

Wuxi Huishan Automatic Controller Co.,Ltd was founded in 1988. Total area 8400 m² standard modern workshop. We are ISO9001:2008 approved.

We have been producing high quality thermostats, thermostatic radiator valves, liquid sensors, room thermostats, floor heating thermostats etc. We strictly produce according to the international standards with a result that our products are EN215,CQC,CE,UL approved. We also offer **ODM** and **OEM** service to our customers.

We look forward to developing the market and technology with our overseas partners.

散热器恒温阀介绍

Thermostatic radiator valves introduction

028

恒温阀有阀头TF-6和阀体DN15-B组成，已经通过EN215认证。此款为自调控制阀，无需外部能量，可以独立调节每个房间的温度，维持一个恒定的室温要求。具有节能，易使用性。

工作原理：通过阀头TF-6中的液体感温元件感受房间温度，从而改变水流量，以此调节和控制房间温度。例如，当室内温度升高时，温度传感材料的热膨胀性将会压缩阀杆关闭阀门。相反，阀杆将回弹打开阀门，从而实现一个更加舒适的温度环境。同时，如果房间内有其他辅助热源（比如阳光或其他加热器），阀门会关小来减少散热器内的水流量，最终实现节能的目的。

Thermostatic radiator valves in this design is composed of Model TF-6 thermostatic valve head and the Model DN15-B angle valve and passed En215 quality certification integrally.

Thermostatic radiator valve in this design is the self-adjustable control valve without needs of external energy, it can be adjusted independently for temperature in each room. And thereby maintaining a constant room temperature required. It features energy-saving and easy to use and so on.

The working principle of this design of valve is: the liquid temperature sensing element in Model TF-6 thermostatic valve head is to feel the room air temperature, and thereby changing the heating water flow, so as to regulate and control room temperature: i.e., when the indoor temperature rises, the thermal expansion of the temperature sensing material shall compress to the valve stem to close down the valve up to shut up, and on the contrary, the stem shall rebound to open up the valve. In this way, a more comfortable temperature environment for people is achieved. Meanwhile, if there is other auxiliary heat source (such as sunshine or other heater etc) in the room, the valve shall close down a little to reduce the water flow into the radiator, and achieve the target of energy-saving in the end.

产品安装和注意事项

Installation and precautions

1. 安装前旋下DN15-B的蓝色保护帽，确保是箭头方向安装在管子上。
1. Remove the protective cap from the body(DN15-B) before installation, make sure to arrow direction for installation and turn it on the pipe.
2. 安装时，首先应将阀头旋钮转动到“5”的位置，保持阀头水平安装到阀体上。其次应将阀头圆螺母旋到阀体外螺纹接口，直到拧紧。
2. To facilitate the installation of thermostatic valve head (TF-6), the handle should be set at the maximum open position(i.e the position of number 5)before installation, and then, turn the locking nut of the thermostatic valve head (TF-6) firmly to the threads of angle valve(DN15-B)
3. 为有效的开启和关闭阀门，恒温阀的阀杆应处于水平位置，故散热器恒温阀头应水平安装(如图1)。同时，为了使阀体内用于关阀的阀杆正确动作，阀头不能直接暴露在阳光下，也不能太靠近窗帘等装饰物和家具，应保持阀头周围的空气能自由流动(如图2)。
3. As the thermostatic is required to feel the indoor temperature, therefore, when installing, it is a must to keep the thermostatic radiator valve at a relatively open place where there is good ventilation. The thermostatic valve head (TF-6) must be installed in a level way, not in a vertically upright way, and at the same time, it must be kept away from spots where there is curtain, heating pipeline, or furniture etc, and to avoid direct exposure to the sun.
4. 在夏季，为了避免不必要的外力作用在阀头上，应将阀头旋钮设置到“5”的位置上。
4. In order to avoid high temperature in summer caused super-pressure acted on the thermostatic valve and hence to make it early damage , please turn the temperature indicator arrow on the valve head to number 5 of the temperature scale.
5. TF-6散热器恒温阀头具有防霜冻的功能。当环境温度在0°C，将阀头旋钮转到“*”处，以保持阀门有极细小的热水流过，防止水路系统霜冻结冰。
5. This design of thermostatic radiator valve features the function of anti-freezing; please set the temperature indicator arrow to the snow tag * in winter, lest water flow frozen in the pipe when the ambient temperature is below zero.

TR系列中央空调温度控制器

TR series room thermostat for central air conditioner

- Application: control of central air conditioner or heating appliance for room temperature.
- The modern design perfectly matches any room design. The ergonomic control knob is detachable to avoid a change of the setting of temperature. The room temperature controller is available in different designs: simple design, with indicator lamp, ON/OFF switch and summer/winter switch.
- Regulating range: 5°C ~ 30°C
- Contact capacity: 16A(4)/250V
- Temperature differential: < 1°C
- Sensor type: gas filled sylphon

主要功能 The main function

TR-110H T6375B 1286

- 1.有独立的系统控制开关
- 2.手动三档风速转换
- 3.将风机控制与冷暖功能转换组合在同一拨动体上

- 1. Have an independent system of control switch
- 2. 3-speed switch
- 3. Heat-fan-cool controlled by a single switch

TR-110E
T6373A 1108

- 1.有独立的系统控制开关
- 2.手动三档风速转换
- 3.一般适用于单制 温度控制
- 4.自动控制电动阀，风机不受温度开关控制

- 1. Have an independent system of control switch
- 2. 3-speed switch
- 3. Generally applies to the single pole control system
- 4. Automatic control of electric valve, and the fan is not controlled by the temperature switch

TR-110K

- 1.有独立的系统控制开关
- 2.风机由温度开关自动控制
- 3.两组加热器可独立控制

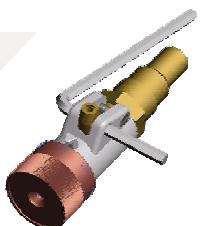

- 1. Have an independent system of control switch
- 2. The fan is controlled by the temperature switch
- 3. Individual control for two heating elements

水采暖控制 Heating system accessory

YC-1超温保护泄压阀
Temperature relief valve

主要适用于锅炉等温度过热器具的保护 最大泄压流量: 93KW 连接阀: 1/2" 传感线:1500mm
泄压温度: 95°C
With double sensor and test facility for boiler with integrated heater in enclosed solid fuel heating system up to max 93kw.
Valve size:1/2"
Relief temperature:95°C
Capillary length:1500mm

炉门温控
Draught regulator

主要适用于煤炉及柴炉的炉门温度控制。当温度升高时炉门关闭。
温度调节范围: 30~90°C
工作范围: 0~100°C
Application: control the temperature of cast iron boiler. When reach the setting temperature, close the door of the cast iron boiler.
Temperature range:30~90°C
Working temperature:0~100°C

FM流量计
FM flow meter

配套于分水阀在暖通工程中各室内的流量调节,通过该产品可调节流量使各水流达到一致。
Application: installed on manifold for heating system, to control the flow rate for different rooms. The regulating of the flow meter helps to balance the flow rate of different rooms.(the indication of flow rate is only for reference, it may have tolerance)

FM-A范围: 0.6 ~ 2.4L/min
Range of FM-A: 0.6 ~ 2.4L/min

FM-B范围: 5 ~ 0.5 L/min
Range of FM-B: 5 ~ 0.5 L/min

流量调控阀
Flow control valve

作用: 用于风机盘管、太阳能等水系统管道流量的调节与控制。
Application : Use to regulate and control the flow of pipeline ,fan coil units ,solar energy ,etc.

技术参数:

Technical parameters:
1.流量范围: 0.5~5L/min
1.Flow range: 0.5 ~ 5L/min

2.接口螺纹: G1A
2. Interface thread: G1A

特点:

Features:
1.经济适用
1.The economy applicable
2.小巧灵便
2. Small facility
3.操作方便
3. Easy to operate

水采暖控制 Heating system accessory

电热执行器

Electrical actuator

电热执行器广泛应用于风机盘管、地暖散热器的采暖控制。
Application: central air conditioner, radiator control or floor heating control.

水采暖控制 Heating system accessory

FS流量开关 适用于制冷、供暖以及感应经过管道的液体流量变化等。

FS flow switch Application: switch on or switch off of the flow by measuring the variation of fluid pressure in the heating or cooling system.

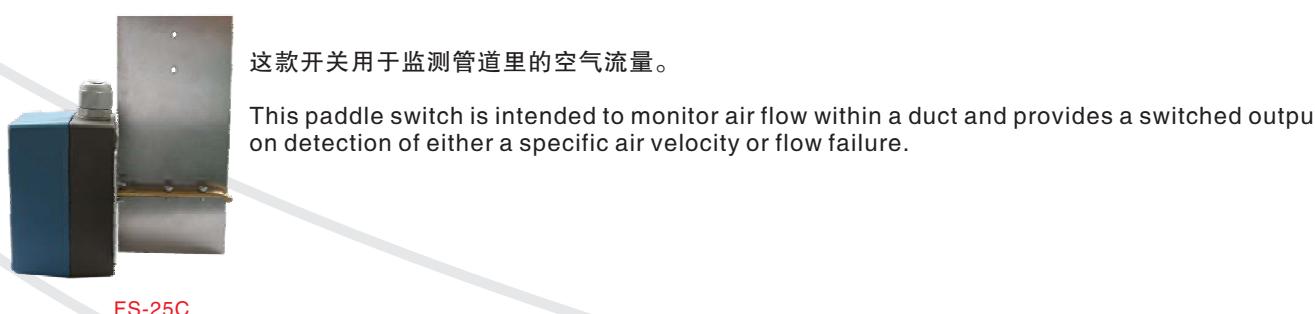

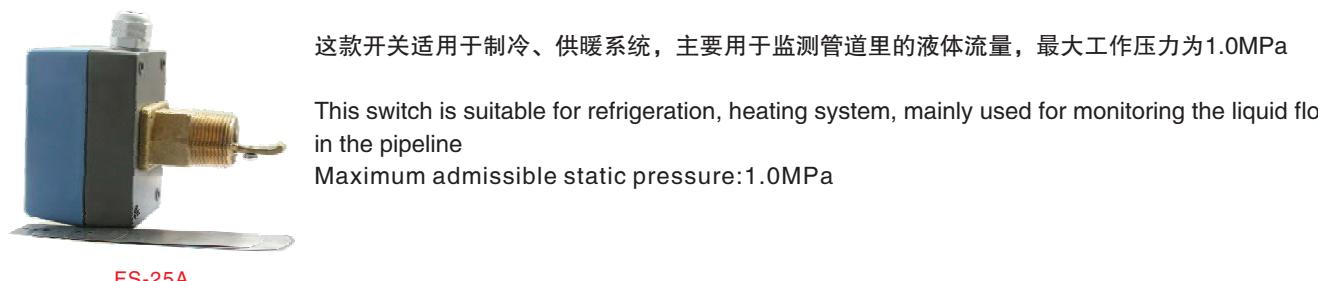

主要参数

The main parameters

电器额定值: 16A/220V ~ 250V 使用温度范围: 1 ~ 100°C 最大压力: 10bar 接口: 1" 最大管径: 3"
Electrical rating: 16A/220V ~ 250V Using temperature range: 1 ~ 100°C Maximum admissible static pressure: 10bar
installation size: 1" The largest diameter: 3"

水采暖控制 Heating system accessory

LS液位开关

Float switch

LS-25A

这款开关主要用于控制液体位置,最大工作压力为0.5MPa

This switch is mainly used to control liquid level in a tank or vessel, to provide a switched output to provide local alarm pump or valve control.
Maximum admissible static pressure: 0.5MPa

Model	Operating temp		Materials			Switch rating	Protection	Dimensions		wiring diagram

水采暖控制 Heating system accessory

回水恒温箱
TCB series multibox

TCB-1

应用于水采暖的加热控制;
Application: heating control for water heating system

TCB-2

应用于水采暖的回水温度控制;
Application: control the temperature of water flow back, heating control for water heating system

TCB-3

应用于水采暖的回水温度控制及单人间地暖的加热控制;
Application: control the temperature of water flow back

TCB-4

应用于水采暖的回水温度控制，并带有可以配合房间温控器用于房间控温的电热头。
Application: control the temperature of water flow back, installed with electric thermo actuator which is controlled by room thermostat.
